Elevation models metadata

DEM_geo: Canopy elevation models aligned horizontally to the first set (2 October 2014) using the centers of Attalea palms and tree crown centers as manual control points

DEM_clip: Canopy elevation models clipped using the polygon of the 50 ha plot plus an extension of 25 m

DEM_clip_1m: Canopy elevation models resampled to 1 meter horizontal resolution

DEM_dif_cor: Difference of successive elevation models corrected vertically (more details in the description)
